# SYNC MATTER 4D

SYNCMATTER 4D è l'innovativa tecnologia sviluppata da Sichenia che ridefinisce il concetto di superficie ceramica sincronizzata.

Grazie all'integrazione tra applicazione digitale multispessore e stampa ad altissima risoluzione, grafica e struttura vengono progettate come un unico elemento, creando una perfetta corrispondenza tra ciò che si vede e ciò che si tocca.

Il risultato è una nuova generazione di superfici ceramiche: più profonde, più realistiche e straordinariamente autentiche.

SYNCMATTER 4D is Sichenia's innovative technology that redefines synchronized ceramic surfaces.

By combining advanced multi-layer digital application with ultra-high-definition printing, design and texture are developed as one, creating a seamless connection between visual appearance and tactile sensation.

The result is a new generation of ceramic surfaces: deeper, more realistic and remarkably authentic.
